

eDiscovery for Metallic

Preserve data with less headaches, fewer oversights, and with more velocity

eDiscovery for Metallic® Office 365 Backup and Metallic® Endpoint Backup provides a singular interface to drive organizational compliance with better speed and precision. Paired with Metallic data protection, organizations now get the best of industry-leading backup and recovery, combined with advanced tools to satisfy regulatory compliance – all from one, singular SaaS solution.

Say goodbye to disparate applications and expensive third-party solutions. With eDiscovery for Metallic, you get inclusive coverage that fluidly spans across Office 365 and Endpoint workloads, making compliance a breeze.

- ✓ Rapidly identify pertinent emails and files – active or deleted
- ✓ Uncover data buried deep within workloads
- ✓ Seamlessly locate records across Office 365 and Endpoint environments, in unison
- ✓ Preserve data for legal and regulatory purpose with flexible pst exports
- ✓ Maintain EDRM compliance, adhering to identification, collection and processing protocols

eDiscovery for Metallic supports:

Exchange Online

Endpoints

With the eDiscovery package from Metallic, you get inclusive coverage that fluidly spans across Office 365 and Endpoint workloads, making compliance a breeze.
